  - [Order Status](#): Check your confirmation email or log in to your Pirate MIDI store account
  - [Returns & Warranty](#) email us!
- 

## 1. Product Support

### Troubleshooting Your Device

Before contacting support, quickly check: - You're using a **known-good USB cable** (data-capable, not charge-only).

- The device has **consistent power** (5V USB or 9V DC, centre-negative). - TRS MIDI cables match the device's **Type A/B** setting.
- You're using the [latest firmware](#) (see Firmware Updates below).
- The device appears correctly in the [Pirate MIDI Web Editor](#).

If issues continue, contact support and include: - Which device (e.g., Bridge6, Bridge4, Scribble, uLOOP+, Flexihub Lite)

- Firmware version - Your setup description including cables you're using, pedals or hubs you're interfacing with, and step-by-step details of the issue. - Screenshots or short videos if possible
