

Web editor overview

Using the Web Editor

Import Screen Overview

- **Import from Device** — connect your device by USB and import all its configuration
- **Import from File** — use a Pirate MIDI .json config file to load a configuration (backups, alternate configs etc.)
- **Create from Template** — use pre-made configs including blank, factory default, and brand or device starting templates from Pirate MIDI

Main Screen Overview

Each preset on the device and the editor primarily contains **these elements**:
